

OSIKOYA OLAOLUWA DAVID

Frontend Developer

osikoyaolaoluwa2021@gmail.com | +234 9018900936 | github.com/Osikoya17 | linkedin.com/in/olaoluwa-osikoya | Nigeria

PROFESSIONAL SUMMARY

Frontend developer and final-year Computer Engineering student who builds responsive, component-driven interfaces with React, Next.js and TypeScript. Experienced in turning client requirements into shipped features and collaborating with backend developers and designers. Grounded in object-oriented programming and clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Frameworks: React.js, Next.js

Styling: Tailwind CSS, Bootstrap

Tools: Git, GitHub, REST APIs

Practices: Responsive design, Component architecture, OOP

Strengths: Problem solving, Team communication, Receptive to feedback, Meets deadlines

PROFESSIONAL EXPERIENCE

Frontend Developer — Dexter Inc

Lagos, Nigeria (Hybrid) · Jan 2025 – August 2025

- Developed and deployed a responsive Learning Management System with Next.js and Tailwind CSS, optimized for mobile, tablet, and desktop users.
- Implemented core learning features such as course enrollment, lesson access, progress tracking, and resource management based on product requirements.
- Collaborated with backend developers and UI/UX designers to integrate APIs, refine user experiences, and deliver new features efficiently.

Frontend Developer — Vivmeds Pharmacy

New York, United States (Remote) · Sept 2022 – Jan 2023

- Built and shipped a single-page application using Next.js and Tailwind CSS, delivering a fully responsive interface across mobile, tablet and desktop breakpoints.
- Translated client requirements into working software features, sustaining a 100% customer satisfaction rating across the engagement.
- Partnered with backend developers and designers to scope and review new features, contributing to API and design discussions ahead of implementation.

Full-Stack Development Trainee — SQI College of ICT

Oyo State, Nigeria (On-site) · Aug 2020 – 2022

- Completed an intensive frontend programme covering HTML5, CSS3, JavaScript, Python, Node.js, MongoDB, SQL fundamentals.
- Built component-based interfaces in React.js that consumed REST APIs to render dynamic data.
- Applied Git for version control, branching and collaborative development workflows.
- Practised object-oriented and procedural programming in Python.

PROJECTS

Zentry

React.js · Next.js · Tailwind CSS | github.com/Osikoya17/zentry-clone

- A modern landing page clone inspired by Zentry, built to showcase immersive animations, responsive design, and interactive user experiences.
- Implemented reusable React/Next.js components with Tailwind CSS, smooth animations, responsive layouts, and optimized page structure.
- Strengthened my skills in building highly interactive, responsive interfaces and translating complex visual designs into production-ready components.

Me-Tube

TypeScript · React.js · REST API | github.com/Osikoya17/me-tube

- A YouTube-inspired video platform that lets users discover, search, and explore videos through a clean and responsive interface.
- Integrated REST APIs to dynamically fetch and display video data, with TypeScript providing type-safe development across the application.
- Improved my experience working with external APIs, asynchronous data fetching, and building responsive React applications.

EDUCATION

BSc Computer Engineering

Obafemi Awolowo University · 2020 – Present · Final year

West African Senior School Certificate

Rhema Chapel International College · 2013 – 2019
